

# Physikalisches Kolloquium

Pol-equator-pole, zonally averaged temperature anomaly (relative to the mean of 1850 to 1900) of the Earth's surface since the birth of physical climate modelling (Analysis by Christian Wirths, University of Bern).

**“Climate crisis: What physics predicted 50 years ago is now reality”**

**Prof. Dr. Thomas Stocker**  
**Climate and Environmental Physics (CEP)**  
**Physics Institute, University of Bern**

**Freitag, 06.05.2022**  
**INF 308, Hörsaal 1**

**17:15 Uhr**
