The Twelfth International Conference on Ultra-Relativistic Nucleus-Nucleus Collisions will be held from May 20-24, 1996 in Heidelberg, Germany. The site will be the Kongreßhaus Stadthalle on the Neckar river in the center of old Heidelberg, and the conferees will be housed in a number of neighbouring hotels within walking distance.

The conference will consist of invited talks and some selected contributions. The main focus will be on strongly interacting matter at high energy density. Topics to be discussed will include new data from experiments with very heavy ions at Brookhaven and CERN, theoretical developments, related astrophysical aspects and future perspectives. The official language will be English.

The conference will be jointly organized by GSI Darmstadt and the University of Heidelberg. If you wish to receive further announcements, please return the attached form by October 1, 1995.
