

CQD Kolloquium

$t = 0 \text{ ms}$	$t = 10 \text{ ms}$	$t = 20 \text{ ms}$	$t = 30 \text{ ms}$
$a_s = 130a_0$	$a_s = 80a_0$	$a_s = 80a_0$	$a_s = 80a_0$
$\omega_\rho = 2\pi \times 70 \text{ s}^{-1}$	$\omega_\rho = 2\pi \times 70 \text{ s}^{-1}$	$\omega_\rho = \omega_z = 0$	$\omega_\rho = \omega_z = 0$
$\lambda = 0.75$	$\lambda = 0.75$		

„Self-bound droplets of a dipolar Bose-Einstein condensate“

Prof. P. Blair Blakie
Department of Physics & Dodd Walls Centre
University of Otago, Dunedin, New Zealand

Mittwoch, 28.06.2017 17:00 / 17:30 Uhr
Kirchhoff-Institut
INF 227, SR 1.403
